SAVE TIME

FOUNDATION is a modular platform system engineered to deliver all the strength and stability of traditional platforms, but in a fraction of the time. Time is money! From start to finish, FOUNDATION is hassle-free. Spend less time planning, budgeting, purchasing and installing!

REDUCE COSTS

FOUNDATION platforms are an economical choice vs. other homegrown methods for designing and installing platforms. And, it is so versatile that it can easily be disassembled and re-used when needs change. Simple design. Simple installation. Simple maintenance. That adds up to money in the bank.

STAY GREEN

FOUNDATION platform tiles are manufactured using 100% post-consumer Polypropylene and the aluminum frame is 100% recyclable. All manufacturing of FOUNDATION is in the USA reducing the environmental impact of cross continental emissions. Plus, as needs change, FOUNDATION platforms can be reused over and over again.

STOP INJURIES

FOUNDATION platforms raise employees to the proper height and help prevent Musculoskeletal Disorders in the workplace. The lightweight but powerful design also makes installation and handling less risky. And the FOUNDATION system is compatible with ergonomic matting for even more anti-fatigue benefits.

DIAMOND-PLATE FILLER

FOUNDATION platforms can be customized down to the inch in any direction! These durable aluminum tiles are corrosion resistant and can take a beating!

OPTIONAL RUBBER FEET

Reduce the movement of FOUNDATION platforms by using optional Rubber Feet. Simply slide the leg cross brace up and place a foot on the bottom of each leg. (For use on FOUNDATION platform 5" or higher).

Foundation ramps

FOUNDATION Ramps create a smooth transition on and off FOUNDATION work platforms. 36" Wide ramp sections are placed at the end of the platform, locking in safely and securely. Made from heavy duty aluminum, 3 standard FOUNDATION ramps are available for platform heights from 4"-12". GripSafe Tape is available for added traction.

FEATURES

- 36" (91 cm) Wide
- 3 sizes to account for different height platforms
- Approximately 9-19 ° slope for safe transition
- Made from heavy duty aluminum
- Customized corners available

FOUNDATION Modular Railing is corrosion resistant galvanized steel. A simple solution that requires no welding or threading. Save time, labor, material, and handling charges associated with traditional railing. Building straight runs and turns has never been easier.

Use on solid concrete surfaces around the perimeter of our FOUNDATION platform system for added safety. Railing is available in 4 stock heights as well as custom heights. Work with a Elitmat expert to plan larger layouts.

Simplicity

1 Slide in cross braces to create individual frames

2 Join frames with tiles

3 Finish off with remaining tiles

Continue the process to desired width. Use FOUNDATION connectors to join sections end-to-end to desired length.

FOUNDATION PLATFORM PLANNING PROCESS

CHOOSE A SURFACE & A PLATFORM HEIGHT

Tiles are available in Smooth, Open and Diamond-Plate surface patterns with heights from 4 to 12 inches.

DETERMINE WHAT PARTS TO ORDER

Use our planning sheet to determine what parts you need or email your plan to obchod@elitmat.sk and we'll send you a list of the parts you need.

YOU DON'T HAVE TO GO IT ALONE!

Technical Sales Support Team is here for you!

1-PERSON WORKSTATIONS

Workstations and equipment maintenance can sometimes be out of reach, forcing employees to overreach, stand on make-shift solutions or spend valuable time fabricating their own.

FOUNDATION makes it easy to plan and install custom platforms that are lightweight, reconfigurable, and easy to maintain.

NO JOB IS TOO BIG!

MULTI-PERSON WORKSTATIONS

This surprisingly lightweight system provides all the support your team demands and more! Each tile boasts a load rating of 400 lbs. and is manufactured of up to 100% recycled Polypropylene to stand up to a wide range of chemicals.

Custom plywood platforms require expensive man-hours, unpredictable material costs and precious production time.

ELEVATION & ANTI-FATIGUE SOLUTIONS

FOUNDATION Platforms are even better when paired with our anti-fatigue mats!

The ultimate ergonomic solution, designed to decrease musculoskeletal disorders and fatigue while increasing productivity, performance and safety.

Smooth surface Platform kits

SMOOTH SURFACE

The textured smooth surface adds traction to your platform, and finishes your layout with industrial grade looks. Keeps carts rolling and work flowing safely. This style provides an ideal base for anti-fatigue matting.

LIFT SLOT

Smooth tiles feature lift slots for easy removal and access beneath.

THE PROBLEM: "I was constantly tripping over a forklift safety bar when servicing our equipment."
SOLUTION: "FOUNDATION has been the perfect solution. It puts me at a better height and I can work without the worry of tripping. It's light enough to move out of the way for fork lifts."

Open surface Platform kits

OPEN SURFACE

FOUNDATION Open surface allows free passage of fluids, debris and airflow. It not only provides elevation, it also provides additional traction in slippery areas.

OPEN DESIGN

Integrated traction points provide long-lasting, reliable slip prevention.

THE PROBLEM: "Before we officially opened, we spent 3 weeks building a custom, 5-inch-tall wood platform. Before we had even moved in, a forklift hit and damaged the plywood platform, delaying us even further."
SOLUTION: "FOUNDATION was much faster to assemble. Instead of 3 weeks, it took more like 3 hours. The aluminum frame is stronger and easier to replace if another fork hits it."

Diamond-plate surface Platform kits

DIAMOND-PLATE SURFACE

FOUNDATION Diamond-Plate tiles offer more than rugged good looks - they provide undeniable traction! Sure-footed employees make for a safer, more productive team.

LIFT SLOT

Diamond-Plate Tiles feature lift slots for easy removal and access beneath.

THE PROBLEM: "It took forever to get a quote on a platform for my employees. Why is it so difficult to get an actual price?"
SOLUTION: "With FOUNDATION I was able to get an exact quote on my platform size including all the parts and pieces."

ANTI-FATIGUE MATTING

Diamond-Plate WOW! Stay-Put Mats

Designed to be used on FOUNDATION Smooth Tiles, Diamond-Plate WOW! matting is the ultimate anti-fatigue solution. Elevate your team while keeping them in top-condition. Diamond-plate matting is designed for comfort and optimized for productivity, these mats are exceedingly popular and have industrial strength for multiple shift operations. The double-thick Nitricell sponge base is a Nitrile composite for exceptional comfort, rebound and long life.

- NFSI Certified Tough abrasion and chemical resistant PVC surface
- Diamond-Plate pattern for improved traction
- Adheres to asphalt, concrete, tile and vinyl
- Choose from 9/16" (815) or 15/16" (814) thickness
- Available in any length or width

ENHANCED RAMP TRACTION

050.4x45YL - GripSafe Reflective Tape

Accessories (Sold Separately)

4" PLATFORM ACCESSORIES

F1.Beam.Anchor.Kit

For use with 4" (10 cm) high FOUNDATION Platform Kits, these corrosion resistant anchor kits secure the platform to concrete floors. Following the assembly of the 4" (10 cm) platform, use 1 kit for each row of beams. Each kit contains 2 plates and 2 concrete screws.

5"-12" PLATFORM ACCESSORIES

F1.LCB.Anchor

For use with 5" (12.7 cm) and higher FOUNDATION Platform Kits, these corrosion resistant 3.25" (8.26 cm) concrete anchor screws keep platforms firmly in place. Prior to installing the tiles, use a 3/16" (5mm) bit to drill 2" (5 cm) deep and secure 1 screw (bag of 10) into each leg cross brace.

EDGE CUSTOMIZATION ACCESSORIES

F1.Paint.YL

Clearly identify edges and pathways by using this durable yellow spray paint. Our unique formula adheres to all components of the FOUNDATION modular platform system.

4" PLATFORM ACCESSORIES

F1.Beam.Join.Kit

For use with the 4" (10 cm) high FOUNDATION modular platform system, these beam join kits connect assembled sections end-to-end to form desired length. Each kit contains 2 connector plates and 4 self-tapping screws.

5"-12" PLATFORM ACCESSORIES

F1.FOOT

TOP

HIGH-TRACTION BOTTOM

Rubber feet reduce the movement of FOUNDATION platforms that are 12 feet (3.66 m) and under. Simply slide the leg cross brace up and place a foot on the bottom of each leg. (For use on FOUNDATION platform 5" or higher.) Each rubber foot is sold individually.

EDGE CUSTOMIZATION ACCESSORIES

Toe Plate

End Toe Plate

F1.TPlate.E.WH

Side Toe Plate

F1.TPlate.B.WH

For use with the FOUNDATION modular platform system, these rigid HDPE toe plates keep objects from falling from the edge of the platform surface. Choose 6' (1.8 m) side plates or 38" (97 cm) end plates.
